- GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this trailer when fully loaded. It includes all weight at the trailer axle(s) and tongue or pin.
- All dry weights are based on the standard model and do not include optional features or equipment.
- Cargo Carrying Capacity is determined by subtracting Gross Dry Weight from GVWR. Cargo includes all fluids, optional features, equipment, and personal cargo.
- Length is measured from hitch or pin box to rear bumper (excludes accessories). Trailer length includes hitch; fifth wheel includes standard pin box.
- Actual height may be lower, based on option offerings. Consult with your dealer to obtain actual height for the unit you are interested in.
- Approximate.
- Water weight equals 8.3 lbs per gallon. Propane weight equals 4.2 lbs per gallon.
- Add 10" if equipped with optional spare tire and carrier.

- Hitch weights are dependant upon how the trailer is equipped with options, on-board cargo, and tank fluid levels. Actual hitch weights may be higher or lower than shown. It is recommended that the tow vehicle and hitch for your trailer have sufficient capacity to accommodate the Gross Vehicle Weight Rating of the selected trailer.
- N/A = Not available at the time of printing.
IMPORTANT— PLEASE READ: Product information, photography and illustrations included in this publication were as accurate as possible at the time of printing. For further product information and changes, please visit our website at www.fleetwoodrv.com or contact your local Fleetwood dealer. Prices, materials, design and specifications are subject to change without notice. All weights, fuel, liquid capacities and dimensions are approximate. Fleetwood has designed its recreational vehicles to provide a variety of uses for customers. Each vehicle features optimal seating, sleeping, storage and fluid capacities. The user is responsible for selecting the proper combination of loads (i.e., equipment, fluids, cargo, etc.) to ensure that the vehicle's capacities are not exceeded.

RV OWNERCARE

See your local dealer for complete details.

Your Local Fleetwood Dealer is:

TO OUR CUSTOMERS...

To make sure that you get the maximum satisfaction out of your recreational vehicle purchase, there are several things you should know:

1. Learn all you can about the travel trailer or fifth wheel you're planning to buy. Don't rely on word of mouth. Get the facts about the actual trailer length, width, unloaded weight with options, Gross Vehicle Weight Rating, and Cargo Carrying Capacity. These are usually available in the manufacturer's sales literature or from the Cargo Carrying Capacity Label located in each trailer. Be sure to check this information before you decide which unit to buy.

2. Verify the towing capacity of your tow vehicle. If you don't know, or aren't sure, you can ask at your automotive dealership or contact your tow vehicle manufacturer. Be sure to match your tow vehicle's tow rating to the Gross Vehicle Weight Rating (not dry weight) of the trailer you are considering. To help Fleetwood travel trailer customers estimate this total weight, our Gross Vehicle Weight Ratings reflect the maximum weight of the trailer when fully loaded for camping. Be sure the weight of the tow vehicle plus the Gross Vehicle Weight of your trailer does not exceed the Gross Combined Weight Rating (GCWR) of the tow vehicle.

Taking these simple steps before you buy will help ensure that your trailer and tow vehicle combination is just what you wanted. See you on the trail!
